Mode selection is done via switches #1 and #2. Mode settings using the switches are as follows:

 #1
 #2

 off
 off
 Semi mode

 on
 off
 3 shot mode

 off
 on
 6 shot burst mode

 on
 on
 Full auto mode

Rate of Fire and timing is as follows:

Dip switch #3 and #4		(regist	(registers Solenoid on times in milliseconds)		
	#3 #4				
	off off	= 06 n	ns		
	on off	= 08 n	ns		
	off on	= 10 n	ns		
	on on	= 12 n	ns		
	Dip switch #5,#6 and #7	(regist	(registers Solenoid off (delay before re-cycle) times		
	#5 #6	#7	in milliseconds)		
	off off	off	= 70 ms		
	on off	off	= 80 ms		
	off on	off	= 90 ms		
	on on	off	= 100 ms		
	off off	on	= 110 ms		
	on off	on	= 120 ms		
	off on	on	= 130 ms		
	on on	on	= 140 ms		

Dip switch 8 is slated for an LCD usage to display mode, cycle rate and shot count.

on = display yes off = display no

As you see, calculating the cycles per second is easy and precise. For instance, if, S3 is off & S4 is on, S5 & S6 are off and S7 is on the rate is calculated as .010 + .110 = .120. A total of cycle times of .120 = 8.33 cycles per second(1 divided by .120). This is the calculation for semi-auto Cycles Per Second mode.

3 shot, 6 shot, and full-auto cycle rates are adjusted to meet the paintball industries

rate of fire maximum requirements. To calculate CPS for 3,6, and full, simply multiply the switch settings for #5, #6, and #7 by 1.5.

#5 #6 #7(ie (off off off = 70 ms) 70 ms X 1.5 = .105 ms) example: if #3,#4,#5,#6,#7 are all switched off (which is the fastest cycle rate in any case) then the calculation would be as follows

.07 X 1.5 = .105 .105+.006 = .111 1 divided by .111 = 9.00 Cycles Per Second

Firing the Defiant

Keep your finger out of the trigger guard and away from the trigger; point the muzzle of your gun in a safe direction at all times during this process. Be sure your goggles are securely in place. Push the on-off switch into the off position.

Always keep your Defiant pointed in a safe direction!

- Place the empty loader onto the gun. Be sure that it is securely mounted in place.
- 2. Apply the compressed gas, pressurizing the gun.
- 3. Put the paintballs into the loader.
- 4. Remove the barrel plug.
- 5. Aim the gun at the target.
- 6. Push the on-off switch to the ON position, the LED will light up.
- 7. Place your finger on the trigger.
- 8. Pull the trigger with a smooth squeezing motion. BANG

UNLOADING THE Defiant

Keep your finger out of the trigger guard and away from the trigger; point the muzzle of your gun in a safe direction during this entire process. Always keep your Defiant pointed in a safe direction!

- 1. Push the on-off switch to the off position the LED will be off.
- 2. Place the barrel plug into the end of the barrel.
- 3. Remove the pressurized gas from the marker carefully.
